

Project Presentation

Digital History

This presentation is not a final product but a work in progress to receive constructive peer review before completion. The project should show considerable progress toward completion if not complete entirely. The presentation should be 12-18 minutes long and include a demonstration of the project. The presentation should include the following:

1. **Introduction:** Introduce the project and its significance. What is the project about? Why is it important? What are the goals of the project?
2. **Methodology:** What methods did you use to create the project? What tools did you use? What sources did you use?
3. **Results:** What are the results of the project? What did you find? What did you learn? How did the tools you use lead to those findings?
4. **Challenges:** What challenges did you face in creating the project? How did you overcome those challenges? How did you adapt your methods to address those challenges?
