Project: Data Questions Check-In
Python

This assignment is completed through the class GitHub repo. You should have linked to the class GitHub repo via the link from the professor. If you have not done so, please do so now.

See the instructions for connecting to the GitHub Classroom

Each student will submit a Jupyter notebook (.ipynb) that will submit their dataset as a DataFrame. In a markdown cell, the student should explain the dataset they have chosen and the question they are trying to answer. Why do you think this dataset is interesting? What do you hope to learn from it? What are your goals?
